

The Ultimate Hot Ink Roll Coder

The Hot Ink Roll Coder has been done full model change enabling high speed coding area which is difficult with the Thermal Transfer Coder. Robust design and simple rotative part increased the durability drastically. High speed operation is available even under the tough circumstances.

High Speed And Narrow Pitch Coding

This Hot Ink Roll Coder has the fastest coding ability among contact-type coders. It enables 600 shots / minute at maximum.

Full Digital Control

It can automatically and properly control numerical data such as coding pitches and temperatures and has achieved more stable coding operation.

SPECIFICATION

Model	HR-40V
Type	Continuous Hot Ink Roll Coder
Drive Method	AC Servomotor
Maximum Speed	60M/min
Maximum Capacity	600rpm
Maximum Coding Area	3 lines × 36mm
Coding Pitch Range	50 to 999mm
Power Supply	AC200V, 500VA, 50/60Hz
Configuration	Main Body · Control BOX · EUI · Encoder
Operating Environment	Temperature : 5°C-40°C Humidity : Under 90%RH (no dew condensation)

The specification may differ from conditions of use.
