

HAND APPLIED CLOSURE-LABELS

Series P-100

P-100: Front Printed by 884 Thermal Printer

P-100: Back (Facing consumer) - Custom printed at factory.

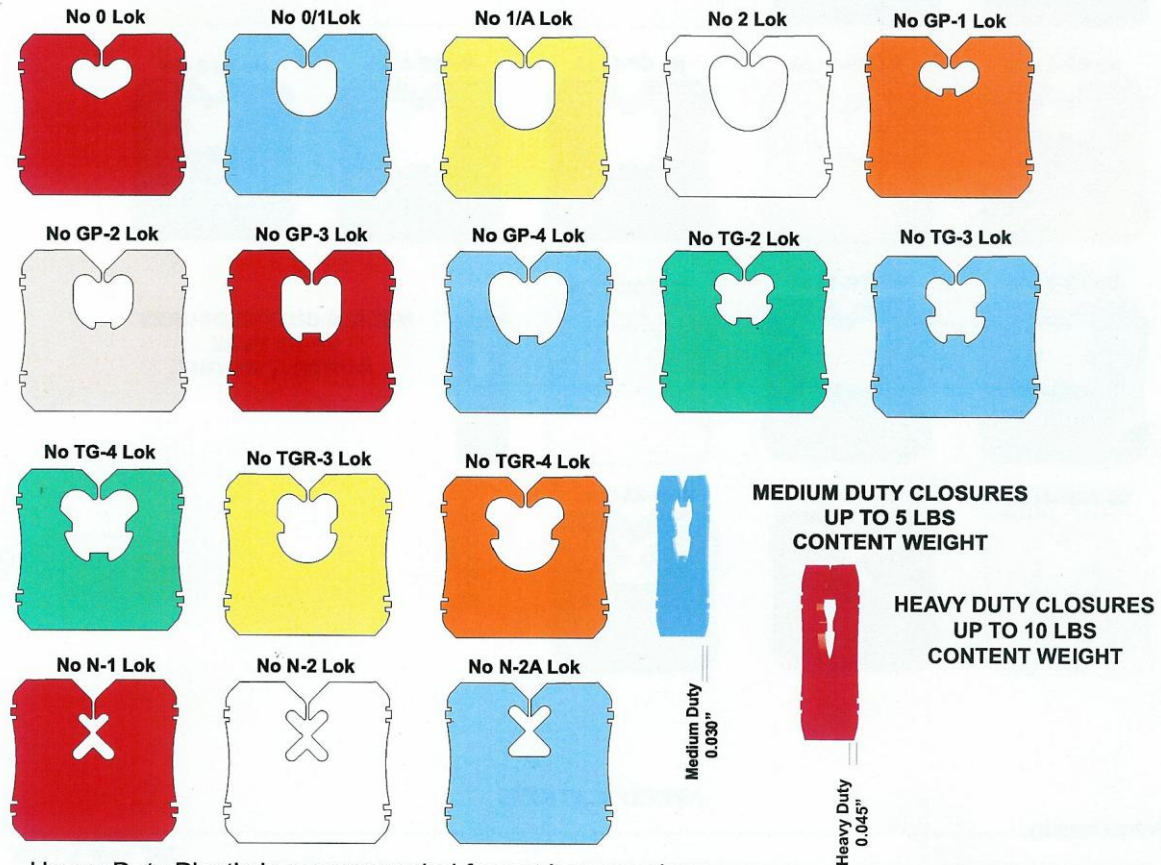

The Series P-100 Label is designed to be printed with Kwik Lok's 884 Thermal Printer. The printer can print bar codes, and other label variables. The P-100 and 884 Printer allow the packager to print their own labels. The back of the label can be preprinted at a Kwik Lok plant with custom graphics. Labels are available in LEFT HAND ONLY.

SEE APPENDIX FOR ADDITIONAL CLOSURE-LABEL PRINTING INFORMATION.

Labels with medium duty closures are packaged on rolls containing 2,000 labels with 16M per carton (8 rolls). Labels with heavy duty closures are packaged on rolls containing 1,500 labels with 12M per carton (8 rolls).

After the labels are printed by the 884 Printer, they can be separated by Kwik Lok's optional separating unit that removes the labels from the rolls.

Labels glued to a medium closure are available in seven plastic colors. Labels glued to a heavy duty closure are available in three plastic colors. Labels can be printed on our standard CIS Tagboard or a synthetic label material.

Heavy Duty Plastic is recommended for net bag openings.
