

TYPE 082 SEMIAUTOMATIC BAG CLOSING MACHINE

The 082 offers the packager an inexpensive and virtually maintenance-free semiautomatic bag closing machine that can CLOSE and LABEL bagged packages in one easy operation. The machine's unique design has eliminated motors, gears and other maintenance-demanding parts. The result is a machine that will give years of trouble-free operation.

The 082 uses custom printed labels. The label can be printed in any number of colors on one or both sides. The label size is 2-3/4" long x 7/8" deep (7 cm x 2.22 cm). Graphics can include text material, logos, photo illustrations, bar codes, Price Lookup numbers or any other information required.

Models are available with a Trodat® Printer for printing price, dates or code information. The printer uses disposable ink cartridges and 'grooved, press-on' rubber type. Individual type kits are available.

The printer will print on the front of the label. In order to provide good ink absorption, the label front will be the uncoated side of the tagboard.

Stainless steel models are available.

SPECIFICATIONS

HEIGHT: 20.5" (52.1 CM)
 WIDTH: 8" (20.3 CM)
 LENGTH: 26" (66 CM)

APPROXIMATE SHIPPING DIMENSIONS
