

TYPE 087 SEMIAUTOMATIC BAG CLOSING MACHINE

The 087 Semiautomatic Bag Closing Machine uses many of the same closures as the 865 Automatic Bag Closing Machine and any other automatic set up to run NRP type Kwik Lok bag closures. The 087 accepts labels printed with Kwik Lok's 884 Thermal Printer.

The 087B features a closure sensor that utilizes a fiber optic thru-beam photo eye. This enhancement over the original 087A replaces several mechanical devices, thereby simplifying the design and improving reliability.

The machine is supplied with a table top stand or will also mount to any one inch outside diameter pipe or tube.
